

# Graph Exploration Seminar

*Paper:*

*Student:*

## **Setting**

Introduce the model considered in the paper (undirected vs. directed graph, single vs. multi-agent exploration, perception and communication of agents, etc.). Specify the objective/goal of the considered exploration problem.

## **Results**

Give a concise list of results for the studied setting.

## **Techniques**

Provide a high-level outline of proof(s) of the main result(s).

## **Related Work**

List the 3 most relevant related papers that the paper builds upon (using `BIBTEX`) with a brief description.
